

What is a 200 watt solar panel kit?

A 200 watt solar panel kit is typically made up of two panels of 100 watts each, sold together to generate a total of 200 watts of power. Two 100-watt panels are combined to create a 200-watt solar panel kit. This is slightly below the standard power output in the residential solar panel market, and a 200-watt solar panel kit will produce less electricity than most residential panel models.
