Do I need a 750W PSU for 8pin & 4pin connectors?

And to plug both 8pin and 4pin connectors I need to buy either a Corsair RM850i (since even the 750W one has only one 12V connector) or at least a 750W PSU from some other manufacturer. That's probably right, you'd have to buy a 750W to use a board with those connectors.

Does a 650W PSU have a 4pin connector?

At the same time, all the better motherboards (AsRock X470 Taichi, ASUS Crosshair VI Hero etc.) have one 8pin connector AND one 4pin connector to supply a CPU. Which means with a 650W PSU (or even a Corsair RM750i) you're able to use only the 8pin connector, because your PSU only has one, leaving the 4pin connector on your motherboard not used.
