

What is the Aurora inverter used for?

The Manual: 3.3 APPROPRIATE USAGE Revision: NA1. 0 PVI-5000-6000-OUTD-US The AURORA Inverter is a photovoltaic inverter that converts direct current of a PV array into alternating current and feeds that power into the power-distribution grid. This AURORA Inverter is suitable for outdoor installation only.

Where can I contact ABB solar inverters?

or PVI-5000/6000-TL-OUTD | ABB Solar Inverters 3 Support and service ABB supports its customers with a dedicated, global service organization in more than 60 countries, with strong regional and national technical your local ABB representative or visit: m/solarinverters Copyright 2014 ABB.

How much does a Aurora inverter weigh?

This AURORA Inverter is suitable for outdoor installation only. Page 14 of 92 The Manual: Revision: NA1. 0 PVI-5000-6000-OUTD-US The inverter weight is about 75lbs and is susceptible to tipping.

What inverters are available?

inverters: Weidmüller PV-Stick or WM4, MultiContact MC4 and Amphenol H4. Refer to the document "String inverter - Product Manual appendix" available at

Can a photovoltaic system be implemented with a Aurora inverter?

Larger photovoltaic systems may be implemented by using several arrays connected to one or more AURORA inverters. WARNING: String voltage shall not exceed 600 Vdc for any reason, so as to avoid damage to the equipment. NOTE: A minimum input voltage of 200 Vdc is required for Aurora to start the grid connection sequence.

What is a Aurora pvi-5000/6000-OUTD?

The block diagram shows an AURORA PVI-5000/6000-OUTD with two independent input DC-DC converters; each converter is dedicated to a separate array with independent Maximum Power Point Tracking (MPPT) control. This means that the two arrays can be installed in different positions and orientations. Each array is controlled by an MPPT control circuit.

All you need to know about the PVI-6000-OUTD-US [240V] | Extended Warranty solar inverter including rating, cost, efficiency, and warranty terms.

- 8 - 000417BI 1- Premessa e generalità; 01, Staffa 02, Vite di Blocco 03, Dissipatore 04, Connettori Riprogrammazione DSP 05, Coperchio Frontale 06, Pannello LED ...
