

What is Solarpower Europe?

SolarPower Europe is the award-winning link between policymakers and the solar PV value chain. Get to know the SolarPower Europe team working to transform the European energy system. Get to know everything about solar power. Interested in joining SolarPower Europe? Become a member! Solar For Europe!

How much solar energy does the EU generate?

In 2024, 46.9% of the electricity generated in the EU came from renewables and 22.% of it came from solar energy (Eurostat, March 2025). The EU solar generation capacity keeps increasing and reached, according to SolarPower Europe, an estimated 338 GW in 2024. The EU has long been a front-runner in the roll-out of solar energy.

Is solar a good source of energy in the EU?

Solar is the fastest growing energy source in the EU and is cheap, clean and flexible. The cost of solar power decreased by 82% between 2010-2020, making it the most competitive source of electricity in many parts of the EU.

What is the best year for solar energy in Europe?

In 2024 the EU broke its own solar PV installation record with over 66 GW, making it the best year in European solar history. With profound technological advances decreasing the cost of solar energy by 90% since 2009, solar is the most affordable source of energy today.

Is solar energy the most competitive source of electricity in the EU?

The cost of solar power decreased by 82% between 2010-2020, making it the most competitive source of electricity in many parts of the EU. In 2024, 46.9% of the electricity generated in the EU came from renewables and 22.% of it came from solar energy (Eurostat, March 2025).

Will solar become the most affordable source of energy in Europe?

With profound technological advances decreasing the cost of solar energy by 90% since 2009, solar is the most affordable source of energy today. Even cautious estimates anticipate solar will become the dominant source of energy in Europe by 2050.

SolarPower Europe is a trade association consisting of 55+ staff, representing over 300 organisations from 40 countries across Europe and the world. We offer a multicultural work ...

SolarPower Europe's annual award-winning Global Market Outlook for Solar Power is the most authoritative market analysis report for the global solar power sector.. With comprehensive ...

As we enter a new political era in the EU, each episode uncovers how solar is delivering on Europe's competitiveness, security and climate goals. In this episode of Shine On Policymast, ...

Meanwhile, current trends in the EU power system, coupled with climate and energy policy targets towards 2030 and 2040, indicate that variable renewable energy sources ...

Solar is the fastest growing energy source in the EU and is cheap, clean and flexible. The cost of solar power decreased by 82% between 2010-2020, making it the most competitive source of electricity in many parts of the ...

Plug-in solar photovoltaic (PV) products are gaining momentum across Europe as households seek to all avenues to produce their own solar electricity. The solution consists of ...

The EU power sector is undergoing a deep transformation, spurred on by the European Green Deal. Solar generation (11%) overtook coal (10%) for the first time in 2024, ...

Lina Dubina, Policy Advisor for Sustainability at SolarPower Europe commented; "Solar growth is unparalleled, and we are working to achieve a minimum 750 GW EU target by ...

In December, SolarPower Europe published its flagship EU Market Outlook for Solar Power. Following several years of over 40% year-on-year growth, our data showed that ...

SolarPower Europe's new European Market Outlook for Solar Power 2023-2027 reveals a record 56 GW of solar installations in Europe in 2023. This marks the third year of ...

Solar is the world's fastest growing energy source - claiming two-thirds of all new renewable power capacity installed and the highest growth rate in terms of electricity generation across ...

As the global market for clean energy technologies is set to be worth \$2 trillion by 2035 and solar energy continues its upward path as the fastest growing energy technology in the world, the ...

SolarPower Europe's annual EU Market Outlook helps policy stakeholders in delivering solar PV's immense potential to meet the EU's 2030 renewable energy targets. Produced with the ...

The European Solar PV Industry Alliance was launched by the Commission together with industrial actors, research institutes, associations and other relevant parties on 9 December 2022 to support the objectives of the ...

More than 500 solar leaders met in Brussels this week for the SolarPower Europe Summit to discuss energy flexibility and EU policy. The EU energy chief said the Affordable ...

In the wake of the publication of the EU Market Outlook for Solar Power 2023-2027, it is worth taking a closer look at Eastern Europe, a region that has demonstrated ...

The EU Solar Standard puts the power in citizens' hands and will enshrine the energy transition into the places where we sleep, work, and live. As the grid catches up to the ...

Adding wind power complements solar generation, as wind often produces energy when solar output is low, for example at night or during winter. This increases the number of ...

Solar power continues to make a significant contribution to the overall increase in renewable energy production in Europe. The total renewable energy produced in the continent increased from 295.7GW in 2009 to ...

When it comes to solar power per capita, Europe's long-time solar leader, Germany, does not hold the first position. For the second year in a row, the Netherlands ranks first, reaching the ...
