

Who is Solar Accreditation Australia?

Solar Accreditation Australia is the solar installer accreditation scheme operator. The accreditation scheme fully transitioned from the Clean Energy Council to Solar Accreditation Australia on 29 May 2024. To find accredited installers, you will need to conduct your own online search for installers in your area.

What is an accredited solar installer?

Accredited installers are certified and trained to ensure your rooftop solar system and battery meet industry best practice and all relevant Australian standards. In some states and territories, the law requires accreditation for all solar installers.

Who installs a solar system in Australia?

The solar retailer then subcontracts an accredited installer to install and set up your system. Whoever you buy your solar system from, it must be installed by an accredited installer for you to access Australian Government rebates under the Small-scale Renewable Energy Scheme (SRES).

How do I find accredited solar installers?

To find accredited installers, you will need to conduct your own online search for installers in your area. Before seeking a quote, be sure to ask for the installer's Solar Accreditation Australia accreditation number and check their accreditation status.

Why should you choose a CEC accredited solar installer?

The CEC had worked closely with the government, the public and regulators on policies, standards and advocating for growth in the renewable energy industry, helping lay the foundations for the Solar Accreditation Australia to continue that same work. CEC-accredited installers (now SAA-accredited) offer evidence of proven quality.

Why is a solar installer accreditation important?

Installation of solar products is complex and installation costs can be high, so the peace of mind that comes with installer accreditation is important. Quality installations and safe processes, particularly with rooftop solar panels and other higher-risk solar systems, should be non-negotiable.
