

Can I add more solar panels if my roof is old?

Do not add more solar panels to your system if your roof is old, it is a leased system, or if you do not have enough roof space for extra panels. Contact your original solar installer to add more panels to your system. Why add solar panels to an existing solar system?

Should you add a solar power system to your home?

Installing solar panels can help you significantly reduce your electric bill each month. However, you may still receive an energy bill. If you aim to reduce your electric bill to \$0.00 or below, you'll need to take additional steps.

How do I get more solar panels on my roof?

Working with your original solar installer is the best way to get more panels on your roof. Your initial installer will be comfortable with your system, know which permits you must apply for when adding panels, and what equipment will pair best with your existing system.

How can I use solar energy to power my home?

To power your home with solar energy, you have two primary options: install panels on your property or join a community solar farm. The latter involves paying a monthly fee to get power from a solar farm. Due to recent policy changes, there are numerous community solar farms planned for Maine.

Can I install solar panels myself?

It is technically possible to install additional panels yourself, but we don't recommend it. Installing your own solar panel system is dangerous, as with any project involving electrical work. DIY installations also mean you must handle permitting yourself, which can be a lot of time and paperwork.

How much does it cost to install new solar panels?

Unfortunately, there is no one-size-fits-all answer to what adding new panels will cost, but in general, you can expect it to be around the same average cost to install solar, about \$3.00 per watt. The following table outlines an estimated cost for installing additional solar panels to your existing system: \*Assumes 400-watt panels
