

What is a solar-powered generator?

A solar-powered generator, also known as a portable power station, is a clean and efficient charging system that doesn't require gas or produce noise. I started using these a few years ago and was thrilled with their performance.

What can a solar powered generator charge?

Solar-powered generators can charge a variety of devices, including power tools, laptops, and personal devices like Bluetooth headphones and speakers. With a higher power capacity, they can even power household appliances during power outages.

Which solar generator should I buy?

For top value, I recommend the Anker 757 solar generator. It impressed our testers with its smart design, solid construction, and competitive pricing. Anker is another leader in the backup power space.

Can a solar-powered generator power a house?

A solar-powered generator with a higher power capacity can even power household appliances in the event of a power outage. And the fact that these are solar-compatible means you aren't reliant on the electrical grid to recharge them.

What makes the Anker 757 solar generator a good choice?

The Anker 757 solar generator is a good choice because it impressed our testers with its smart design, solid construction and competitive pricing. Anker is another leader in the backup power space.

What factors should you consider when buying a solar generator?

When selecting a solar generator, consider the following key factors: Capacity: Typically measured in watts, capacity tells you how much power a generator can deliver. Think about your home's total power needs. Solar generators come in all shapes and styles to serve a variety of needs.
