

# Affordable solar power for your home south africa

Why should you choose a solar system provider in South Africa?

As a leading solar system provider in South Africa, we specialise in delivering high-quality, sustainable, cost-effective solar solutions tailored to your unique home and office needs. Find affordable solar for sale to beat load shedding and reduce your electricity bills.

How to get a solar and backup power system in South Africa?

South African households looking for the most affordable solar and backup power solution can rent a system with minimal or no upfront cost and low monthly subscriptions compared to buying. There are three main ways to get a solar and backup power system in South Africa. Firstly, you can buy it with cash or take out a loan to pay it off over time.

Should you rent or buy solar in South Africa?

In South Africa, the cost of electricity is going up. Plus, there's often load-shedding. Solar hire offers a smart way to step into the world of renewables without a big initial payment. We'll look at how rent to own solar in South Africa, how these plans work, their costs, and the pros and cons compared to buying solar outright.

Why should you hire solar power in South Africa?

You make a difference by choosing solar power with a simple, monthly payment. This reduces your electricity bills and makes you more energy independent. In South Africa, with high electricity prices and power cuts, solar hire is a smart choice. It makes solar energy more accessible. Homeowners and businesses can easily switch to solar.

Are solar rent-to-own plans a good choice in South Africa?

With solar hire, the rent can go up every year. These increases in the cost of a solar rent-to-own plan can make the deal less affordable over time. Make sure to look closely at the agreement's terms, especially the bit about rental hikes. Despite these issues, many in South Africa find solar hire a good choice.

What size Solar System do you need in South Africa?

Typically, South African households require solar systems with an inverter capacity in the range of 3kW to 12kW, depending on their energy consumption needs. To determine the size of the solar system you need, it's essential to calculate your household's average energy consumption.
