

Are black Americans underrepresented in solar industry?

Black Americans are widely underrepresented in the solar industry. The Solar Foundation and the Solar Energy Industries Association published a diversity report earlier this year that found that executive leadership in solar companies is almost exclusively white men.

What percentage of Solar executives are white?

The 2018 solar census found that 7.6% of 242,000 solar workers nationwide are African American. However, the executive leadership in solar companies is almost exclusively white men. (The passage does not provide the percentage of white executives directly, but the given information implies that they make up the majority.)

Who is WDC Solar?

Mark Davis is the Founder of WDC Solar, a minority-owned solar installation company located in Washington, D.C. called WDC Solar, Inc. The company was created to ensure that low-income communities have a stakeholder interest in the solar industry.
