

Does AGL offer solar feed-in tariffs?

AGL is one of Australia's three largest energy retailers. AGL provides a number of electricity plans for solar owners with a range of solar feed-in tariffs (FIT). Listed here are AGL solar feed-in tariffs for households in NSW, QLD, SA and VIC. Select your State below to view solar feed-in tariffs for AGL's plans.

What is a solar feed-in tariff?

Your solar feed-in tariff is what your energy company pays you for any solar energy you generate that gets exported back to the grid. Below, you will find AGL solar feed-in tariff rates for their standard solar FiT and Solar Savers Plan FiT. For more information about AGL electricity and gas rates, visit Selectra's AGL Rates guide.

What is a 10c/kWh solar feed-in tariff?

A 10c/kWh solar feed-in tariff means you'll receive 10 cents for every kilowatt-hour of solar energy you export to the grid, up to the first 10kWh every day. Plus, enjoy a \$100 credit when you join AGL electricity.

How can AGL help you get the most out of solar?

After you're all set up with solar, AGL can help you get the most out of your solar system through special solar deals and feed-in tariffs (FiT). Feed-in tariffs are a form of rebate whereby customers are compensated a few cents for every unused kilowatt-hour (kWh) of electricity exported to the energy grid.

What is a feed-in tariff?

Learn about feed-in tariffs, solar credits and billing information for your solar system. A feed-in tariff is the rate paid for electricity fed into the grid. You can get paid for it in cents per kWh that will appear as a credit on your bill. Maximum system capacity and eligibility criteria apply.
