

What is the AGL solar project?

The AGL Solar Project aimed to increase knowledge in large-scale solar energy through the construction of two solar photovoltaic (PV) power stations in New South Wales. ARENA has congratulated AGL Energy Limited on breaking ground on the construction phase of the Nyngan Solar Plant.

How much did the NSW Government commit to the AGL solar project?

The NSW Government committed \$64.9 million to the project. View a listing and read all the reports from the AGL Solar project. The AGL Solar Project aimed to increase knowledge in large-scale solar energy through the construction of two solar photovoltaic (PV) power stations in New South Wales.

Did AGL acquire firm power & terrain solar?

In August 2024, AGL announced the acquisition of Firm Power and Terrain Solar. Firm Power was a battery project developer and Terrain Solar was a solar project developer. Following the acquisition, AGL has several proposed battery and solar projects underway.

What will AGL do with its 'bulk energy' assets?

AGL will develop most of its new "bulk energy" in the form of joint ventures and partnerships, as it has and is doing with Tilt, Someva and in its new Gippsland offshore wind project, but it wants to mostly own the battery storage assets, because they are fully dispatchable.

Who is AGL's EPC contractor?

AGL engaged First Solar as the engineering, procurement and construction (EPC) contractor for the project. First Solar built the power stations using its thin film PV technology and will maintain the facilities for an initial five year period post-construction.

How many MW does a solar power station generate?

Combined, the projects generate up to 155 megawatts (MW) (AC) of electricity. Knowledge gained through the construction and operation of large-scale, grid-connected solar power stations will help solar energy to play a bigger role in meeting Australia's electricity needs.

Supporting the local community. In recognition of the important relationship we have with the Latrobe Valley community, AGL has committed a total investment of \$50 million to support the transition of the Loy Yang A

...

On an annual basis, the Broken Hill Solar Plant produces enough electricity to meet the needs of approximately 23,000 average Australian homes. Broken Hill Solar Plant was one of two large-scale solar photovoltaic (PV) ...

AGL Energy has shut its Liddell coal power station, ending fossil fuel generation from the site after 52 years,

in the first major test of how the energy grid deals with huge change.

2 Discount off upfront costs of \$1,000 for NSW, QLD, VIC households and \$1,500 for SA households, for customers who buy a new solar battery or solar battery bundle through AGL or one of our third-party installers, ...

Power giant AGL is testing ways to turn off its coal units so it can dodge the daytime onslaught of rooftop solar flooding the grid with cheap electricity. Credit: Rob Homer

In the place of the retired coal-fired power station, AGL planned to construct "Hunter Energy Hub," which would utilize several (then unnamed) renewable energy sources along ...

We've partnered with the Salvation Army to deliver solar energy systems at up to 850 Salvos sites across Australia. ... (EV) charging stations at selected Salvation Army sites. The solar installations are expected to generate ...

AGL Hydro generates electricity to meet peak customer demand to help avoid power outages. AGL Hydro's ability to respond to rapid changes in customer demand is extremely valuable. Established from the breakup of the ...

Use solar power when it's available and access the grid at other times. Excess energy can be sent back to the grid, and you may receive a feed-in tariff. ... AGL recognises the Aboriginal and Torres Strait Islander peoples as ...

for the AGL Energy Solar Project is, "Knowledge gained through the construction and operation of large-scale, grid-connected solar power stations will help solar energy to play a bigger role in ...

If you're keen to make a difference and develop your career in renewables, there are plenty of reasons to join AGL. Our commitment to responsibly reshape our future energy ...

AGL Energy Generation. AGL boasts Australia's most extensive electricity generation portfolio that consists of a mix of Coal & Gas-fired power stations, hydroelectric ...

If you're an AGL electricity customer you can simply ask us; Learn more Back Back. Close. Find a charger ... you'll need to charge your EV using a public charger. There are around 2,500 public charging stations across ...

AGL's revenue from renewable generation is derived by: multiplying the proportion of total generation output (GWh) to the pool that was sourced from wind farms, hydroelectric power ...

This is power generated by the sun, through either photovoltaic technology or secondarily using concentrated

solar power. Photovoltaics use the photovoltaic effect to adapt ...

This report summarizes the outcomes of the AGL Energy Solar Project, which involved the construction of two large-scale solar photovoltaic power stations in Nyngan and Broken Hill, New South Wales. Key sections ...

AGL Energy Ltd boosts renewable energy portfolio with AUD 250 million acquisition of Firm Power Pty Ltd and Terrain Solar, expanding development pipeline to over ...

AGL may also enter into an offtake agreement to purchase SunDrive's solar modules made at the new site. The project aligns with AGL's plans to transform the sites of its ...

In August 2024, AGL announced the acquisition of Firm Power and Terrain Solar. Firm Power was a battery project developer and Terrain Solar was a solar project developer. Following the acquisition, AGL has several ...

AGL Energy, Australia's largest coal generator, and SunDrive, an innovative solar company from Australia, have recently partnered up to explore the possibility of establishing a solar manufacturing facility at the former ...
