

How do portable power banks work?

These portable power banks are charged by solar power to provide USB charging for mobile devices, using new photovoltaic technology. They work like a small-scale version of a solar panel. It stores energy from the sun in a rechargeable battery to allow charging on demand.

Should you use a solar power bank?

Battery life can be a big concern; if you're using your device a lot, it can lose charge too quickly. When this happens, we're forced to seek out a charging point. This can pose problems if you find yourself in a place without plug sockets. Enter the solar power bank, a portable, lightweight power solution that can provide charge wherever you are.

What can you charge with a solar power bank?

A solar power bank can charge devices that can be charged via USB. Solar panels can typically still be used to charge power banks that don't have solar inputs, but you may need to get a third-party adapter to go from your panel to the USB.

Do battery banks work with solar panels?

The main use for a portable solar charger is to power your device when you're away from power outlets. Most of the battery banks with an integrated solar panel don't work as well unless you point them directly at the sun, but they cost less than many standalone solar panels do.

Which solar power bank is the best?

The Solgaard Solarbank is our top pick due to its high value. It's light, durable, charges quickly, and stores up to 5 full phone charges. However, if you need a larger battery capacity, consider other options as well.

What is a portable solar charger?

A portable solar charger is a device used to power your electronic devices when you're away from power outlets. Its main purpose is to provide a convenient and eco-friendly charging solution on the go.
