

Aims power solar pv dc quick disconnect switch dc1600v32v2io

When is the AIMS disconnect switch useful?

The AIMS quick disconnect switch is ideal for applications such as cabins or vacation homes that don't require delivery of constant solar power. Simply disconnect your solar array and reconnect when needed. Some US locations require a disconnect switch. PV system arrays generate DC current and need to be disconnected for maintenance or safety.

What is the AIMS quick disconnect?

The AIMS quick disconnect is a safety and flexibility feature for your solar system. It allows you to quickly and conveniently disconnect DC power from solar panels to inverter/batteries.

Why is a quick disconnect switch necessary?

PV system arrays generate DC current, and it's necessary to disconnect them for maintenance or safety. The AIMS quick disconnect switch is also ideal for applications such as cabins or vacation homes that don't require constant solar power. Simply disconnect your solar array and reconnect when needed.

How much does aims power cost?

The AIMS Power Solar PV DC Quick Disconnect Switch is available from \$9690 on Amazon, with free shipping. This product is from a small business brand.

Who is AIMS Power?

At AIMS Power, our mission is to be leaders in the design and development of off-grid and renewable energy. A leader in solar power and safe energy storage for more than 20 years, AIMS Power is the answer to all of your solar and backup power questions.
