

Are airports a good place for EV charging?

Airports, as one of the major transportation hubs, are the perfect place for electric vehicle (EV) charging. In fact, the airport EV charging station industry is predicted to generate over 1.2 billion EUR by 2031. The time to get on board is now. In this blog post, we will explore:

Do airports charge EVs?

Most airports that have installed EV charging points in their car parks do not charge extra for charging, once you have paid for the parking. Charging stations that are located near to airports usually charge around 10p-14p per kWh. How long does it take to charge an EV?

Why do airports need EV charging stations?

Most airports are limited by the amount of electricity they can use from the electric grid. EVESCO's unique combination of energy storage and fast charging technology can increase power output enabling the rapid deployment of EV charging stations without the need for expensive electric grid upgrades.

Do airport car parks have EV charging points?

And airport car parks are gradually coming to the party too, installing EV charging points and providing a charging service while you are away on your travels. If you are driving your electric vehicle to the airport, it makes sense to be able to have your car charged up, while you are away.

How do I charge my electric car?

To charge your electric car, you need to plug it into a charging point at the airport car park or hotel you're at (see our above tables for airports, airport hotels and airport car parks that have electric car charging stations).

Where can I charge my car at Manchester Airport?

Closest to the APH Car Park is the NewMotion Charging Station at 11 Styal Rd, Wythenshawe, Manchester M22 5WB or the ChargeYourCar Charging Station at 874 Wilmslow Rd, Manchester M20 5WP. There is also a charging point at the Clayton Hotel, close to the airport terminals, and at the BP garage on the airport perimeter road.
