

What is AKG model solidtube?

The AKG Model Solidtube is a large diaphragm condenser microphone that benefits from the combination of modern solid-state technology and vacuum tube driven circuitry. The microphone, released in 1997, AKG's Jubilee year, provides the characteristic warmth and generous margin of overload expected from classic tube powered designs.

What year did the AKG N-solid microphone come out?

The microphone, released in 1997, AKG's Jubilee year, provides the characteristic warmth and generous margin of overload expected from classic tube powered designs. Solid state electronics within the N-Solid power supply ensure quiet and reliable operation.

What accessories do I need for my AKG acoustic microphone?

An aluminum flight case, all cabling, isolation shock mount, and windscreens shall be included as standard accessories. The microphone shall be the AKG Acoustics Model SOLIDTUBE. Valid only in the United States.

Is solidtube suitable for acoustic instruments?

This is predominantly a vocal mic and the presence peaks have been tailored to that application, but the SolidTube is also eminently suitable for acoustic instruments, percussion, and even electric guitars.

What is AKG acoustic warranty?

Valid only in the United States. AKG Acoustics warrants AKG products against defects in material or workmanship for a period of three years from the date of original purchase for use, and agrees to repair or, at our option, replace any defective unit without charge for either parts or labor.

Will AKG reimburse my shipping cost?

An established company such as AKG should work with you, and most likely reimburse your shipping cost. As long as you talk reasonable, and hit those main points they will most likely pay more attention to this claim. Of course you are going to need to speak directly with the manager, that's the best approach to fix such a pain in the ass situation.

The AKG "The TUBE" is not to be confused with the more expensive AKG V12 VR or the lesser AKG Solid Tube. It is a quality microphone with a 1" capsule and comes with a shock mount and a power supply which includes the adjustment ...
