

## **Al power s rates customers with solar power**

What are solar customers in Alabama paid for their solar energy?

Solar customers in Alabama get paid a lot less for making solar energy than customers in other states. On top of that, Alabama solar customers are paying for backup power in their regular bills, and paying an extra backup power fee.

Why does Alabama Power charge a fee for solar panels?

The PSC echoed Alabama Power's position that the fee is necessary because otherwise solar customers would not be paying their fair share of the costs of all the power plants, lines and poles that are needed to deliver power to their house when their solar panels aren't producing.

How much do solar panels cost in Alabama?

That request was approved last year when the PSC dismissed the challenge to the fee. Currently, an Alabama Power customer a 5 kilowatt solar array, about the average size for a rooftop system, would pay the company \$27.05 in fees each month regardless of how much energy they used or how much their panels produced.

Is Alabama Power overcharging its solar customers?

He says Alabama Power is charging its solar customers unfairly in a couple of ways. First, solar customers in Alabama get paid a lot less for making solar energy than customers in other states. On top of that, Alabama solar customers are paying for backup power in their regular bills, and paying an extra backup power fee.

How much does a 5 kilowatt solar array cost in Alabama?

Currently, an Alabama Power customer a 5 kilowatt solar array, about the average size for a rooftop system, would pay the company \$27.05 in fees each month regardless of how much energy they used or how much their panels produced. The plaintiffs say that fee is punitive and meant to stifle the small-scale solar industry in Alabama.

How much does rooftop solar cost in Alabama?

Alabama Power, which supplies power to much of Alabama, charges customers with rooftop solar a monthly fee of \$20-32 for an average-sized system. If the fee is found to violate federal law, some advocates believe Alabama would see a surge of rooftop solar installations, as the state catches up to the rest of the nation.
