

Can you save money on solar in Alabama?

We've also listed several tax incentives and rebates to help you save money on your solar power system. The state of Alabama does not currently have a state incentive to help you save money on your energy consumption, but there are federal and some local programs that can help lower total costs. Why Go Solar in Alabama?

Does Alabama have a solar tax credit?

Many state governments support energy efficiency and alternative energy sources; unfortunately, the Alabama Public Service Commission does not have any programs currently in place to save money at the state level. Alabama residents can take advantage of the Federal Solar Tax Credit and get a discount of 30% applied to their tax returns.

Does Alabama offer a solar rebate?

Unfortunately, Alabama does not offer any cash rebates for solar panels.

When does a solar purchase in Alabama pay back its initial investment?

At the current rates, the Alabama Power rate PAE and rate rider RGB mean a solar purchase in Alabama won't pay back its initial investment until after 15 years. Considering the average monthly savings of a 6-kW system in Alabama are around \$90 per month, the \$30 fee reduces your net benefit from solar by one third.

Should Alabama pay for solar panels?

Instead of incentivizing solar installations, Alabama allows its largest utility, Alabama Power, to pay pennies on the dollar for excess energy generated by solar installations. This policy results in solar panel payback times being nearly the worst in the nation.

How does Alabama compensate for excess solar energy?

Instead of paying the full price for excess solar energy, Alabama allows its largest utility, Alabama Power, to pay pennies on the dollar for it.
