Does Alabama Power pay less for third-party energy producers?

Alabama Power is paying less for power generated by third-party energy producers and imposing a cost for those companies to connect to its electricity grid. The rule was approved by the Alabama Public Service Commission (PSC) in March; took effect in April and applies to companies that can generate at least 100 kilowatts of electricity.

How much do solar panels cost in Alabama?

In 2012, the PSC approved an Alabama Power request to impose a \$5 per kW Capacity Reservation Charge (CRE) on customers with solar panels, often known as a rooftop fee. Typically, households that generate about 5 kW on their solar array will pay about \$300 annually, or \$9,000 over the 30-year expected lifespan of the system.

How much does electricity cost in Alabama?

In February, Alabama Power filed a document with the PSC, the state's electricity regulator, that proposed cutting the rates they pay for third-party electrical generation, known as a Contract for Purchased Energy (CPE), by up to 50%. In one category, the price decreased from about 7.33 cents per kilowatt hour to about 3.65 cents per kilowatt hour.

How much does Alabama Power cost per kilowatt hour?

In addition to the lower rate payments, Alabama Power introduced a Variable Integration Cost at \$0.00193 per kilowatt hour for third-party companies. That would further reduce the revenue that those firms receive for energy purchased by Alabama Power.

Can I Sell my Excess power back to Alabama Power?

You can find special rules governing RGB here. If you would like to consider selling your excess power back to Alabama Power, depending on the size of your generator, you should consider Rate PAE (Purchase of Alternate Energy) for smaller systems less than 100kW, or Rate CPE (Contract for Purchased Energy) for systems 100 kW or greater.
