

Does Alabama have solar power?

Alabama ranks No. 35 among states in terms of total solar power, mostly thanks to a handful of large projects, such as the Walmart-funded solar farm in Chambers County, and installations at military bases.

How much does solar cost in Alabama?

Alabama solar costs are a little higher than average, ranging from around \$20,000 to more than \$30,000. The large differences in the costs of solar panel installations will be primarily due to your home size and how much geothermal or photovoltaic power you need to power your home.

Can you save money on solar in Alabama?

We've also listed several tax incentives and rebates to help you save money on your solar power system. The state of Alabama does not currently have a state incentive to help you save money on your energy consumption, but there are federal and some local programs that can help lower total costs. **Why Go Solar in Alabama?**

How much does rooftop solar cost in Alabama?

Alabama Power, which supplies power to much of Alabama, charges customers with rooftop solar a monthly fee of \$20-32 for an average-sized system. If the fee is found to violate federal law, some advocates believe Alabama would see a surge of rooftop solar installations, as the state catches up to the rest of the nation.

Is Alabama a good state for solar?

According to the SEIA's state residential solar data, Alabama ranks 49th out of 51 among U.S. states, plus Washington D.C. A separate group, the Southern Alliance for Clean Energy ranked Alabama last among Southeastern states in total solar development in its fourth annual Solar in the Southeast report, released last week.

Should you install solar power in your Alabama home?

When a solar power system is installed in your Alabama home, it will increase the value of the property and the building. With this property tax exemption, expect the taxes to remain relatively stable for years. This is something that homeowners should also consider if they plan to sell their homes at some point.
