

Does Alabama have solar power?

Alabama ranks No. 35 among states in terms of total solar power, mostly thanks to a handful of large projects, such as the Walmart-funded solar farm in Chambers County, and installations at military bases.

How much does rooftop solar cost in Alabama?

Alabama Power, which supplies power to much of Alabama, charges customers with rooftop solar a monthly fee of \$20-32 for an average-sized system. If the fee is found to violate federal law, some advocates believe Alabama would see a surge of rooftop solar installations, as the state catches up to the rest of the nation.

Which state has the largest solar array in Alabama?

The AL Solar A solar array near Lafayette, Alabama, is one of the largest solar arrays in Alabama. It was developed by Alabama Power. (Joe Songer | [jsonger@al.com](mailto:jsonger@al.com)). [al.com](http://al.com) Joe Songer | [jsonger@al.com](mailto:jsonger@al.com) Alaska has more residential solar installations than Alabama.

Is Alabama a good state for solar?

According to the SEIA's state residential solar data, Alabama ranks 49th out of 51 among U.S. states, plus Washington D.C. A separate group, the Southern Alliance for Clean Energy ranked Alabama last among Southeastern states in total solar development in its fourth annual Solar in the Southeast report, released last week.

How much does Alabama Power charge for solar power?

Alabama Power's capacity reservation charge was approved by the Alabama Public Service Commission in 2013 at \$5 per kilowatt of solar capacity per month and increased to \$5.41 last year.

How many solar workers are there in Alabama?

The SEIA Solar Jobs Census estimates that Alabama has 481 people working in solar in the state, No. 43 in the country in total and No. 49 per capita. For contrast, Georgia has an estimated 4,466 solar workers and South Carolina has 3,086.
