

How much does Alabama Power charge for solar panels?

The Alabama Public Service Commission on Tuesday granted Alabama Power's motion to dismiss a challenge to the fees it charges residential customers who use solar panels or other methods to generate their own electricity. The PSC also approved Alabama Power's request to increase the fee from \$5 per kilowatt per month to \$5.41 per kilowatt per month.

How much does a 5kw Solar System cost in Alabama?

The fees, \$27 per month on a 5kW solar system, are charged to customers who are hooked up to the Alabama Power grid but also use solar panels to generate a portion of their electricity. Alabama Power has maintained that the stand-by fees are needed to maintain infrastructure to provide backup power when the panels aren't providing enough energy.

Is Alabama's solar fee about to go up?

In fact, that solar fee, one of the highest in the nation, is about to go up. The Alabama Public Service Commission on Tuesday granted Alabama Power's motion to dismiss a challenge to the fees it charges residential customers who use solar panels or other methods to generate their own electricity.

Why does Alabama Power charge a fee for rooftop solar?

Alabama Power charges a fee for rooftop solar because if a customer's panels don't provide enough energy, the utility is still responsible for providing backup electricity. According to Alabama Power spokesman Michael Sznajderman, "There is a cost to have backup power service available to customers who demand it."

How much does a 5 kilowatt solar array cost in Alabama?

Currently, an Alabama Power customer a 5 kilowatt solar array, about the average size for a rooftop system, would pay the company \$27.05 in fees each month regardless of how much energy they used or how much their panels produced. The plaintiffs say that fee is punitive and meant to stifle the small-scale solar industry in Alabama.
