

Should Alabama pay for solar panels?

Instead of incentivizing solar installations,Alabama allows its largest utility,Alabama Power,to pay pennies on the dollar for excess energy generated by solar installations. This policy results in solar panel payback times being nearly the worst in the nation.

Are solar perks available in Alabama?

The perks that are available can make converting to solar a better financial decision and ultimately lead to an average net savings of around \$30,270 after your panels pay for themselves. The chart below includes all of the solar perks available in Alabama.

What incentives are available for solar conversion in Alabama?

The federal credit is an outstanding incentive no matter where you live,but it's especially crucial in Alabama. This is one of the only benefit programs available to directly defray the cost of your system,and it's by far the best incentive available to you for solar conversion.

Does Alabama Power offer a Rate PAE?

If you get electricity service from Alabama Power,you can sign up for their special Rate PAE(Purchase of Alternate Energy). This isn't exactly an 'incentive',but it does help solar panel owners save money in the long term. Under Rate PAE,your solar panels will reduce your bill in two ways.

How does Alabama compensate for excess solar energy?

Instead of paying the full price for excess solar energy,Alabama allows its largest utility,Alabama Power,to pay pennies on the dollar for it.

How much does solar cost in Alabama?

In Alabama,the average monthly savings of a 6-kW solar system are around \$90. However,with a \$30 monthly fee,your net benefit from solar is reduced by one third. Currently,Alabama Power's rate PAE and rate rider RGB mean that a solar purchase won't pay back its initial investment until after 15 years.

.....9 Summary of Needs The Alabama Municipal Electric Authority ("AMEA"), located in Montgomery, Alabama is interested ...
