

Who is Solar Technology Alabama?

Solar Technology Alabama is a provider founded in 2008 by a former Alabama Power engineer, Ron Holland, that focuses on residential solar installations. They offer services such as solar panel installation for off-grid systems, grid-tied systems, and solar water heaters.

Does Mississippi have a solar program?

Just next door, the state of Mississippi has created an innovative program called Solar for Schools using Solar Power Purchase Agreements. By encouraging solar panel placement at schools, this program creates a decades-long revenue stream that provides direct benefits to education in the state.

Does Alabama have an opportunity to increase solar usage?

Yates, of ESL, believes Alabama has an untapped opportunity to increase solar usage in the nonprofit sector. The majority of ESL's business is now coming from North Carolina nonprofits where Third Party Ownership has helped to grease the skids for solar. There are a couple of ways Third Party Ownership has been utilized in nearby states.

What is a solar for schools agreement?

"The Solar for Schools Agreement is a contract that reflects the Public School District's selection of a Third Party Solar Developer to construct, own and operate a solar generating facility and establishes the agreed-upon revenue disbursements from the electric utility to the Public School District and the Third Party Solar Developer."

How much does a solar power system cost?

A Birmingham-based company, Eagle Solar and Light, (ESL) installed the system at Living River. According to ESL Founder and CEO Sam Yates, "A moderate-sized solar power system costs approximately \$225K and can save an organization \$20-25K in energy costs each year." That's a lot of dough!

What is a solar plant?

Solar plants are large-scale installations of solar panels mounted on the ground, designed to capture a maximum amount of energy when the sun is shining. Today, an estimated average of seven acres of land is needed to generate one megawatt of power using solar energy.
