

Is Alabama's solar fee about to go up?

In fact, that solar fee, one of the highest in the nation, is about to go up. The Alabama Public Service Commission on Tuesday granted Alabama Power's motion to dismiss a challenge to the fees it charges residential customers who use solar panels or other methods to generate their own electricity.

How does Alabama compensate for excess solar energy?

Instead of paying the full price for excess solar energy, Alabama allows its largest utility, Alabama Power, to pay pennies on the dollar for it.

Should Alabama pay for solar panels?

Instead of incentivizing solar installations, Alabama allows its largest utility, Alabama Power, to pay pennies on the dollar for excess energy generated by solar installations. This policy results in solar panel payback times being nearly the worst in the nation.

What is a solar tax abatement in Alabama?

In Alabama, a solar tax abatement is a property tax exemption for owners of qualifying renewable energy facilities. The abatement can exempt property tax on the additional value added to a home by a solar installation, for periods of 10 or 20 years, depending on the jurisdiction.

When does a solar purchase in Alabama pay back its initial investment?

At the current rates, the Alabama Power rate PAE and rate rider RGB mean a solar purchase in Alabama won't pay back its initial investment until after 15 years. Considering the average monthly savings of a 6-kW system in Alabama are around \$90 per month, the \$30 fee reduces your net benefit from solar by one third.

What is the price Alabama Power pays for excess energy?

Alabama Power pays around 25% of the price they charge for electricity (which is about \$.12/kWh) for excess energy sold back to them.
