

What is a solar tax abatement in Alabama?

In Alabama, a solar tax abatement is a property tax exemption for owners of qualifying renewable energy facilities. The abatement can exempt property tax on the additional value added to a home by a solar installation, for periods of 10 or 20 years, depending on the jurisdiction.

Should Alabama pay for solar panels?

Instead of incentivizing solar installations, Alabama allows its largest utility, Alabama Power, to pay pennies on the dollar for excess energy generated by solar installations. This policy results in solar panel payback times being nearly the worst in the nation.

How does Alabama compensate for excess solar energy?

Instead of paying the full price for excess solar energy, Alabama allows its largest utility, Alabama Power, to pay pennies on the dollar for it.

What is the federal solar tax credit?

The federal solar tax credit allows you to reduce your federal income tax by up to 30% of the cost of a new solar energy system on your home. The program was created by the federal government in 2005 to make converting to solar energy more affordable for taxpayers.

What incentives are available for solar conversion in Alabama?

The federal credit is an outstanding incentive no matter where you live, but it's especially crucial in Alabama. This is one of the only benefit programs available to directly defray the cost of your system, and it's by far the best incentive available to you for solar conversion.

Is Alabama's solar fee about to go up?

In fact, that solar fee, one of the highest in the nation, is about to go up. The Alabama Public Service Commission on Tuesday granted Alabama Power's motion to dismiss a challenge to the fees it charges residential customers who use solar panels or other methods to generate their own electricity.
