Is solar energy a good idea in Alabama?

Alabama's electricity rates are lower than the United States average, but its residents consume 31.45% more energy than most American households. This usage translates to energy bills about 26.17% higher than usual. Going solar can help residents tap into more affordable renewable energy, reducing their average utility bill spending.

Do solar batteries make sense in Alabama?

Solar batteries make more sense here because you can use the excess power stored in your batteries to lower your bill rather than selling it back to the grid for a lower price. Energy storage can also give you peace of mind during a power outage. Here are some Alabama companies that install panels and solar battery storage systems:

Do solar panels generate more power in Alabama?

On average, Alabama has 213 sunny days per year and about 5 peak sun hours each day. All that sun means solar panels can generate more power here than in other parts of the country, meaning you can install fewer solar panels. If you choose reliable installers, you can trust that these estimates will be as accurate as possible.

Should I get a solar panel system in Alabama?

Depending on where you live in-state, a solar panel system might still be beneficial. Alabamians face some of the highest average electric bills in the country, according to data from SaveOnEnergy, a CNET sister website that covers the consumer energy industry.

How much does solar cost in Alabama?

The average price of solar is about \$1.96 to \$2.94 per watt in Alabama, so anything in that range is a fair price. Some prices may be too good to be true. If your installer quotes you way below the average price in your area, proceed with caution. Installers must charge fair prices to remain in business and provide you with 25 years of support.

How much solar energy does Alabama produce? According to the SEIA, Alabama has the capacity to generate 283.1 MW. One of the state's most significant solar installations is the River Bend Solar facility, which can generate 75 MW; ...
