

How much do solar panels cost in Alabama?

That request was approved last year when the PSC dismissed the challenge to the fee. Currently, an Alabama Power customer a 5 kilowatt solar array, about the average size for a rooftop system, would pay the company \$27.05 in fees each month regardless of how much energy they used or how much their panels produced.

How much does a 5 kilowatt solar array cost in Alabama?

Currently, an Alabama Power customer a 5 kilowatt solar array, about the average size for a rooftop system, would pay the company \$27.05 in fees each month regardless of how much energy they used or how much their panels produced. The plaintiffs say that fee is punitive and meant to stifle the small-scale solar industry in Alabama.

How much does Alabama Power charge per kilowatt?

Alabama Power, in response to the challenge to the fee in 2019, petitioned the PSC to increase the amount of the fee from \$5 per kilowatt to \$5.41 per kilowatt. That request was approved last year when the PSC dismissed the challenge to the fee.
