

Is Alaska solar a good solar company?

While Alaska Solar only offers one solar panel brand -- Qcells -- the panels' better-than-average efficiency rating (20.6%) makes them suitable for low-light conditions. However, Alaska Solar has limited financing options (no leases or power purchase agreements) and only offers the manufacturer's warranty for the equipment.

Who installs solar panels in Anchorage?

Founded in 2015, Arctic Solar Ventures installs grid-tied solar systems and solar batteries in and around Anchorage. The company specializes in residential solar installations and solid-state battery systems. ASV primarily installs REC solar panels -- but the panels do have a high efficiency rating of 22.3%.

Should Alaskans get solar panels?

Despite the slow adoption, Alaskans have many reasons to consider solar panels, according to Chris Rose, founder and CEO of the Renewable Energy Alaska Project, a clean energy nonprofit. "In Alaska, there used to be the question, 'Well, why get solar if it's pretty dark three months a year?'" Rose said.

Can a small business sell solar panels in Alaska?
