

Alice springs and darwin solar power specialists

Is Alice Springs a solar energy powerhouse?

Located in the dry, dusty centre of Australia, Alice Springs once relied exclusively on gas power and diesel trucked in for electricity generation, but has been evolving into a solar energy powerhouse in recent years.

How many solar panels are there in Alice Springs?

By the end of June 2020, around 2,387 small-scale solar power systems had been installed in Alice Springs; representing a collective capacity of more than 13,922 kW kilowatts. That's a great result for a city with a population of around 16,000. Alice Springs also boasts the cutting edge Uterne Solar Power Station.
