

Alko power mover solid wheel ratchet jockey wheel with clamp

What is Alko power mover?

The Alko power mover is the easy and convenient way to move any caravan or trailer without back-breaking effort. The ratchet drive mechanism of the Alko power mover is strong enough to move your caravan or trailer even up small inclines when the ball load does not exceed 150kg. Alko jockey wheel 250mm power mover.

How does the Al-Ko 10in power mover work?

The AL-KO 10in Power Mover has a lever ratchet mechanism built onto the side of the solid rubber 250 mm diameter wheel. The long lever handle then drives the ratchet which turns the wheel with ease and power, this in turn pulls or pushes your Trailer.

What is the height of the Alko power mover?

It is fitted to the normal jockey wheel bracket and can be wound up to a height of 840mm Have a question? ALKO Power Mover jockey wheel, complete with handle and clamp. A most efficient caravan mover featuring original dual pawl ratchet system. This model can be mounted on either side of the drawbar, thereby allowing maximum manoeuvrability.

How does the Alko power mover work?

The Alko Power Mover is designed to aid movement of the caravan or trailer in either forward or backward direction. It can be used to move up a slight gradient and the double pawl system will resist roll back, but the power mover must not be relied upon as a park brake.

What is a KO power mover?

The AL -KO Power Mover is the easy & convenient way to move any caravan or trailer without back breaking effort. The ratchet drive mechanism of the AL-KO Power Mover is strong enough to move the caravan or trailer even up small inclines. Features & Specifications
