

How does Altus work?

Altus Power's community solar program works by applying solar credits to your electric bill. Each month, you will receive a bill from Altus, with your specific savings percentage listed in your contract. For example, if your contract is for a 20% discount, for every \$1.00 solar credit applied, you will owe \$0.80 back to Altus. You must pay both bills.

How does a solar contract with Altus Power work?

Your Altus contract will list your specific savings percentage. For every \$1.00 solar credit applied to your electric bill, you will owe \$0.80 back to Altus. You must pay both bills. For example, if your monthly electricity charges total \$150 and you receive \$100 in solar credits, you will pay \$70 to the utility company and \$80 to Altus.

What is Altus Power's mission?

Altus Power's mission is to create a clean electrification ecosystem across the country. Central to this mission is our commitment to being transparent about the data we collect about you.

Does Altus Power sell customer data?

Altus Power does not sell any customer data. Instead, all data collected is to provide accurate savings information to customers and improve the accuracy of future estimates. Central to our mission is being transparent about the data we collect about you.

How much will you owe Altus for \$100 in solar credits?

If your contract is for a 20% discount, for every \$1.00 solar credit applied to your electric bill, you will owe \$0.80 back to Altus. You must pay both bills. Example: Your monthly electricity charges total \$150 and you receive \$100 in solar credits.
