

How many solar and wind projects does Amazon own?

With more than 500 solar and wind projects globally, Amazon's portfolio is now big enough to power 7.2 million U.S. homes each year. Amazon invested in more than 100 new solar and wind energy projects in 2023, becoming the world's largest corporate purchaser of renewable energy for the fourth year in a row.

Does Amazon have a solar farm?

Among recent wind and solar projects in Europe, Amazon invested in its first solar farm in Greece, following its first in Poland the year before. Rapidly scaling clean energy in the APAC region, Amazon added more than a dozen new projects.

Why does Amazon invest in solar & wind?

"Amazon's investments in solar and wind projects are helping power our operations, while also providing new sources of clean energy to the grid, spurring economic growth, and supporting jobs in the communities where our customers live and work," said Adam Selipsky, CEO of AWS.

Can solar power Amazon fulfillment centers?

We invested in 270 solar arrays on the rooftops and grounds of Amazon fulfillment centers, Whole Foods Market stores, and other facilities. Many of these projects power the Amazon facilities directly, helping defray the amount of energy the buildings need from the grid.

How many solar projects does Amazon invest in?

The majority of the utility-scale projects we invest in connect to grids where we have operations, including our data center regions. For example, in the IAD Region in Northern Virginia, Amazon has invested in 19 solar projects capable of producing a total of 1.3 gigawatts (GW) of renewable energy for the local grid.

How is Amazon working towards a cleaner energy future?

From investing in new carbon-free energy projects to advocating for grid modernization and collaborating with key stakeholders around the world, Amazon is working toward a cleaner energy future. Investing in 500+ solar and wind projects, bringing carbon-free energy to dirty grids, and buying Renewable Energy Certificates all played a role.
