

Will Ameren Missouri build a solar power plant in 2024?

ST. LOUIS, March 21, 2024 /PRNewswire /-- Today Ameren Missouri, a subsidiary of Ameren Corporation (NYSE: AEE), received approval to build or acquire approximately 400 megawatts (MW) of solar energy. The first of the three solar projects is scheduled to go into service in 2025, with two more set to begin serving customers in 2026.

When will Ameren start generating solar energy?

Ameren Missouri plans to start generating solar energy from the new facility by the end of 2024. The company pledged to add 900 megawatts of solar and wind energy to the grid in its integrated resource plan on file with Missouri regulators.

Will Ameren buy a solar farm in Missouri?

Ameren has reached an agreement with solar developer Invenergy to purchase a 150-megawatt solar farm in Missouri for use by its Missouri customers.

What is the cost of solar for Ameren customers?

Here is a monthly and lifetime solar savings estimate for a relatively typical Ameren customer with a \$150 per month electric bill prior to solar and who installs a 11.57 kW solar system. The cost of the solar system for this customer is not explicitly stated in the provided passage.

Who owns Ameren electricity?

Ameren, as the sole distributor in its service region, distributes electricity to 1.2 million customers and natural gas to 100,000 customers. Ameren has generating capacity of around 5 million net kilowatt of primarily coal-fired power, most of which is owned by Ameren Missouri. The holding company distributes electricity.

What are Ameren's new solar farms?

The four solar farms are a leap forward in Ameren's plan to add a combined 2,800 megawatts of wind and solar power by the end of 2030. The additions are meant to help Ameren reach its target to reduce its carbon emissions by 60% by 2030, compared with 2005 levels. It hopes to reach 85% reduction by 2040 and net-zero emissions by 2045.
