

What is American Solar Company, LLC?

American Solar Company, LLC is a solar company that provides you with a solar power system to save money and produce clean energy for your family at an affordable price. Our core value is people helping people. We go a step further by contributing to worthy causes.

How much power does American electric power produce?

American Electric Power produces 18.82% of their total megawatt hour production from nuclear power, for a total of 18,642,218 megawatt hours. By megawatt hours generated, American Electric Power is the 13th largest supplier out of 3517 in the nation.

Does American electric power have a high electricity rate?

American Electric Power residential electric rates are highest in January and the highest average bill is in December. Go Solar for less than your cell phone bill. Roughly 0.88% of American Electric Power's total electricity comes from the use of hydroelectric power.

How much does American electric power cost per month?

The average residential electric bill for a consumer of American Electric Power is \$151.98 per month, while the US average is \$132.69. Consumers of the provider pay 14.54% more compared to other citizens of the nation.

Does American electric power participate in net metering?

Consumers of American Electric Power can participate in net metering, which is a positive for both parties. Net metering allows private citizens to sell electricity back to the grid, making the installation of solar and other electricity sources a cheaper endeavor. Energy loss is part of the process when dealing with electricity transmission.

How much does American electric charge per kilowatt hour?

Consumers of American Electric Power are charged an average residential electricity price of 15.59 cents per kilowatt hour. This is 0.31% less than the national average rate of 15.64 cents. In 2022 they sold 19.82% of their disposition through wholesale channels to other electricity companies.
