

What is the wheel of Fortune?

With that in mind, we wanted to reward customers for taking the trouble. The result: our Wheel of Fortune. It's a completely free 'spin the wheel' for a chance to win a credit prize that customers can access every time they submit a meter reading. You get one spin per meter, per month, with the chance of winning credit from £1 to £64 to even £512!

How much solar power does the US have in 2024?

**US's Solar Dilemma** In 2024, the US solar industry installed nearly 50 gigawatts (GW) of capacity, a 21% increase from 2023 and the highest ever in the last two decades. Now its solar capacity stands at 237.5 GW, according to the Solar Energy Industries Association (SEIA), USA.

How much is the US solar market worth in 2024?

The value of the US solar market in 2024 was \$70.4 billion and is projected to grow to 739 GW by 2035, with average annual capacity additions of more than 45 GW, says SEIA. Fortune India Latest Edition is Out Now!

What is the future of energy?

The future of energy lies in engaging customers. But to do that, energy has to be enjoyable, and genuinely worth people's while. Unplugging your laptop when energy is carbon-intensive is only a hop, skip, and a jump from a world where people are rewarded for using more energy when the wind is blowing, and the sun is shining.

Will solar power be a 'unstoppable force'?

Hydropower - produced by running water, usually from rivers or reservoirs, and the world's oldest and largest single source of renewable power - has hovered at 14%. Phil MacDonald, Ember's managing director, said: "Paired with battery storage, solar is set to be an unstoppable force."

Which country imports the most solar panels in 2024?

The US imported over 75% of the \$16.5 billion worth of solar modules and cells in 2024. Of this, more than half directly or indirectly came from China, say sources. In the case of cells and raw materials, the US is import-dependent, either directly or indirectly, from China.
