What is a Solar Power Purchase Agreement (SPPA)?

A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider for a predetermined period.

Who owns and maintains the PV system in a SPPA?

In a Solar Power Purchase Agreement (SPPA), a third-party developer owns, operates, and maintains the photovoltaic (PV) system. The host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider for a predetermined period.

Who benefits from a solar power purchase agreement?

In a solar power purchase agreement, the host customer and the solar services provider both benefit. The host customer receives stable and often low-cost electricity, while the solar services provider or another party acquires valuable financial benefits, such as tax credits and income generated from the sale of electricity.

What is a Power Purchase Agreement (PPA)?

A power purchase agreement (PPA) is a binding commitment from the applicable Utility for the purchase of the electricity generated by the Facility at a rate not less than \$0.238 US per kWh, for a term of not less than twenty (20) years.

Who owns the rights to additional solar photovoltaic projects in Hawaii?

The Seller owns the rights to additional solar photovoltaic electricity generating projects in Hawaii which are currently on the Utility reserve schedule for application to the FIT Tier 2 or 3 program, excluding the five (5) MW FIT Tier 3 project known as the 'D.R. Horton' Project.

Who finances a SPPA installation?

An investor provides equity financing and receives the federal and state tax benefits for which the system is eligible. Once the SPPA contract is signed, a typical installation can usually be completed in three to six months.
