

What are solar phone chargers good for?

Solar phone chargers are a great way to stay powered up on the go. They are portable, lightweight, and can be used to charge your phone or tablet. Whether you're an outdoor enthusiast or simply looking for an eco-friendly way to charge your devices, read our list of the best solar phone chargers and power banks.

Can a solar phone charger be used anywhere?

A solar phone charger can juice up your devices from, well, anywhere, as long as there is sunlight to power them. Hook up a wire to a solar phone charger for Android and you can even start charging your phone from the middle of the forest. We meant it when we said anywhere. So what are the best options out there?

How many phones can a solar charger charge?

The most expensive solar chargers can charge several phones and tablets at a time. Mid-priced solar chargers can charge up to two phones at a time and are very dependable for that. Budget models are where you can get into trouble. These include most low-cost solar phone cases. Most of these will NOT keep your phone charged if you use it a lot.

What are the different types of solar-powered phone chargers?

Regarding power input, there are two types of solar-powered phone chargers; those that rely on just solar energy and those that can be powered by either solar or a standard electrical outlet. Dual-input (solar and outlet) chargers are handy when you need a backup for use at home and short-term travel.

Can a solar phone charger charge a laptop?

They can only produce enough power for small devices. Unlike larger portable solar chargers, you cannot use them to power your laptop, lamp or medical device. The payoff is that you'll get a charger small enough to put in your pocket. How long does a solar phone charger take to charge a phone?

How to choose a solar-powered phone charger?

The first thing you should always look for when shopping for a solar-powered phone charger is its power capacity. For solar-only chargers, look for the wattage provided by the solar panels. The higher the number of watts, the faster it will charge your phone and the more devices it can charge at the same time.
