

Antra ah7-360-7312 solar power auto darkening welding helmet review

What is Antra ah7-860 series welding helmet?

Antra(TM) AH7-860 Series welding helmet is featured with the smart chip controlled 4 sensor auto darkening lens, which is extremely fast responsive to electric arc from TIG, MIG, MMA or Plasma applications. The luxury jumbo viewing area 3.78X3.50" provides a much better vision of the whole welding process, which ensures a

What are auto-darkening welding helmets?

The name auto-darkening really says it all for you. These helmets are exactly as they sound. They darken automatically when you light up your welding torch. They sense the flame and even the type of flame and they adjust accordingly.

How do you control a welding helmet?

The controls are on the side of the helmet and are easy to control. You can adjust the shade, sensitivity, delay, and even what you're doing - such as welding, cutting, or grinding. Yes, this helmet is auto-darkening but these give you some semblance of control over the helmet as well.

What is a passive welding helmet?

Passive (or traditional) welding helmets are your everyday steel and lens helmet. The lens is a static darkness. In this case, you should be sure to purchase one with a lens that is the ultimate dark level for your needs. You don't want to risk burning your eyes.

Is a welding helmet a good choice?

This helmet is a good option for many types of welding and works for a lot of things across the board. It's not perfect but it has an affordable price tag and works well enough. The large viewing screen is very nice and it's a comfortable helmet that will be reliable and durable.
