

What is APGENCO doing in Anantapur district?

In the renewable energy sector, APGENCO has issued a work order for the development of a 400 MW solar power plant at Thalaricheruvu in Anantapur district. In addition, tendering work for a 100 MW solar power plant in the district is in progress. An additional 10 MW will be added through a wind power project.

What does APGENCO stand for?

Andhra Pradesh Power Generation Corporation Limited (APGENCO) came into existence in 1999, following the unbundling of the erstwhile Andhra Pradesh State Electricity Board into six entities to focus on the core operations of power generation, transmission and distribution.

What is APGENCO's solar power plant load factor (PLF)?

The company's entire solar capacity comes from a 5.42 MW solar photovoltaic power plant, which was commissioned in 2016-17 in West Godavari district. In terms of operational performance, APGENCO has been experiencing a declining plant load factor (PLF), reflecting the country-wide trend in the power sector.

How much power does APGENCO have?

The company's installed base has increased to more than 5.2 GW, of which 600 MW was added in March 2018, with the commissioning of a thermal power project. The genco is now gearing up to add another 3 GW to its portfolio by 2021-22. Installed capacity and performance so far After its bifurcation, APGENCO's total capacity stood at 4,559.6 MW.

Why is APGENCO planning renovation & modernisation works at its power plants?

APGENCO is also planning renovation and modernisation (R&M) works at its power plants on a case-to-case basis, considering the age of the plant, phasing out of plants, etc. It has taken up feasibility studies for meeting the new environmental norms.

What is APGENCO's installed capacity?

Installed capacity and performance so far After its bifurcation, APGENCO's total capacity stood at 4,559.6 MW. As of March 2018, it had an installed capacity of 5,213.02 MW, which includes 3,410 MW of thermal capacity, 1,797.6 MW of hydro and 5.42 MW of solar-based capacity.

ANDHRA PRADESH POWER DEVELOPMENT COMPANY LIMITED ... & Terrorism coverage for entire plant of SDSTPS for a period of one year i.e. from 00.00Hrs on ...

The APGENCO has published a tender for "APGENCO-Setting up of 100 MW grid connected Solar PV power project for completion within fifteen months from date of LOI/PO, on EPC ...

Generation from Solarplants at Polavaram(5.4MW) is 7.58 MU and Talaricheruvu (400 MW) is 773.43 MU FY 2023-24. About 783.11 MU was backed down at APGENCO thermal stations as per the instructions of
