

Aps rebate for electric car charging stations

What are the rebates for EV charging stations?

Similar to the rebates for home EV charging stations, rebates are available to cover the cost of purchasing and installing EV chargers at multifamily residential complexes. This rebate covers up to 50% of the cost of eligible EV chargers, to a maximum of \$1,400 per charger and \$14,000 per building.

Does APS offer free EV charging?

APS offers free EV charging stations, installation, and maintenance to its workplace, fleet, and multi-unit dwelling customers through the Take Charge AZ pilot program. For eligible commercial customers, a 50% cost share may also be required.

What is APS & Electrify Commercial doing in Arizona?

APS and Electrify Commercial are partnering on the first-of-its kind project to jointly develop five high-powered plazas in Arizona. Our clean energy plan is guided by sound science and focused on achieving environmental and economic gains--all while maintaining affordable, reliable service.

Should I add an EV charger to my home?

When adding an EV charger to your home, you will want to make sure you can charge and still save money on 'fuel' costs. Either of our time-of-use plans offer low-cost off-peak hours that will provide savings for EV charging after 7pm or before 4pm on weekdays or anytime on the weekend. This is a time-of-use plan that has a demand charge.

Why is Electrify Commercial launching Take Charge AZ?

Automakers have committed billions of dollars to the development of electric vehicles. This is a great time for consumers to explore the emerging EV landscape. Newly launched Electrify Commercial continues momentum with project to support Take Charge AZ with a total of 20 ultra-fast chargers across the state.
