

What is APS yc1000 microinverter?

Now you know: APS. Our new YC1000 microinverter enters the domestic market as the game-changer that commercial solar has been waiting for. System designers, installers and consumers are ready for our native 3-phase/4-module, 277/480 microinverter specifically designed for large-scale commercial applications. Consider the YC1000 advantages:

What is a yc1000 microinverter?

The solution took more than three years of research and development, but now it's here: the YC1000 microinverter from APS. The native 3-phase, 277/480 unit brings microinverters finally into the realm of large-scale commercial installations, with a groundbreaking approach to the technical challenges of these most demanding environments.

What is a yc1000-3-208 microinverter?

The world's first true 3-phase (no phase balancing) microinverter is also available in a 208V configuration, also with 900 watts AC maximum output, ZigBee communication and an integrated ground. Up to four YC1000-3-208 units (16 modules total, 60- or 72-cell) can be installed on a single 15A circuit.

How many solar modules can a yc500 microinverter handle?

A single APsystems YC500 microinverter unit handles two PV modules, significantly lowering installation and balance-of-system costs. Our fourth-generation YC1000 handles 3 or 4 modules per unit, enabling large-scale, 3-phase commercial solar at an unprecedented price point.

How many microinverters does APs have?

Four modules. One microinverter. Do the math. APS is out in front of the commercial solar market with the YC1000, our native 3-phase/4-module, 277/480 microinverter. Everyone agrees that commercial is the next great frontier in solar, the market segment with the greatest consumer need and the greatest potential for growth.

What is a APsystems microinverter?

When combined with the APsystems Communicator and APsystems Monitor, the APsystems Microinverter lets you track the performance of each module in your PV array through any web-enabled device. A single APsystems YC500 microinverter unit handles two PV modules, significantly lowering installation and balance-of-system costs.

O Micro Inversor APsystems YC1000 Trif&#225;sico. O YC1000 da APsystems é o primeiro Microinversor verdadeiramente trif&#225;sico, compatível com tensões de redes comerciais e residenciais de 220V ou 380V, saída de 900 watts, ...

The ABB MICRO Inverter is compatible with the widest range of panels (manufacturers, power/watts and

voltages). It offers the best panel shading tolerance and performance in low light due to the widest DC input ...

Part No. AC End Cap - YC1000 Terminates the bare wire on the Trunk Cable for the YC1000. o Weather proof termination cap for the bare wire end of the YC1000 Trunk Cable. o Insert five bare wires into five cable clamps to terminate o 41 mm size AC 25A Female Cap AC End Cap - YC1000 Part No. MC4 Caps When only one side of dual YC500 A-NA

The QS1 is a four-module, high-power microinverter for residential applications. A new design for APsystems, the QS1 offers 300% faster installation time, while offering the highest peak output power and up to 3X faster ...

Page 21: Fiche Technique Du Micro-Onduleur Yc1000-3 Apsystems Fiche technique du micro-onduleur YC1000-3 APsystems R&#233;gion Europe Mod&#232;le YC1000-3-EU Donn&#233;es d"entr&#233;e (CC) Plage de tensions MPPT 16 V-55 V Plage de tensions de fonctionnement 16 V-55 V Tension d"entr&#233;e maximale 60 V Tension de d&#233;marrage 22 V Courant d"entr&#233;e maximal 14 ...

The groundbreaking YC1000 microinverter from APS will power a milestone true 3-phase installation going into service in China's Zhejiang Province this week. More than 1.4 MW of the total 8.13 MW project will be generated ...

APsystems is the no.2 worldwide in micro-inverter sales! Their micro-inverters have gained a reputation as extremely reliable, and cost-effective. Features. Works with DS3, YC600 & YC1000 micro-inverters; Life-time free monitoring ...

The YC1000 is the industry's first true 3-phase (automatic phase balancing function) solar microinverter, handling 230V/400V grid voltages with 1000 watts maximum output, ZigBee communication and relays integrated ground. Up to ...

But only the APS YC1000 offers a truly forward-thinking solution for demanding, large-scale rooftop applications while increasing energy harvest, improving project ROI and controlling capital costs. APS had the vision to ...

FOR IMMEDIATE RELEASE September 30, 2014 SEATTLE -- APS, a global leader in solar microinverter technology, will showcase its new YC1000 microinverter for the domestic market at Solar Power International, ...

YC1000-3 World's first true 3-phase microinverter - only from APsystems Commercial Microinverter WIRING SCHEMATIC The YC1000 is the industry's first true 3 ...

Solar Inverter Directory; YC1000-3 YC1000-3 Altenergy Power System Inc. Type: Micro-inverter Power Range: 1.13 kW Region: China Contact Manufacturer Note: Your Enquiry will be sent directly to Altenergy

Power System Inc. ...

Hiervoor heeft u de ECU-C met CT's (Current Transducers van APsystems) met de micro-omvormers (YC600, QS1 & YC1000) nodig. Raadpleeg eventueel de bibliotheek op onze website. Kan ik op de EMA (Energy Monitoring Analyse) ...

La marque Enphase, qui est le pionnier du développement des micro-onduleurs, connaît un autre concurrent dans le domaine : APsystems. YC1000-3 d'APsystems Le YC1000-3 est le premier micro-onduleur solaire ...

APsystems Micro Inverter 1.1kW YC1000-3-208. \$0. price as of April 11 (3) Specification Compare; Input Voltage DC 60; Max. input voltage 60/72 - 120/144 cell; Output Voltage AC 82V-152V; Type Grid-Tie Inverters, Micro ...

The new YC1000-3-208 microinverter from APS has earned CEC certification. The California Energy Commission listing is a key benchmark of solar product efficiency and quality, and qualifies equipment for use and ...

APsystems is the #1 global leader in multi-platform MLPE solutions for the solar PV industry. Our product line includes microinverters, energy storage, and rapid ...

Top ↑ Catalog ↑ Inverters ↑ Inverters ↑ APS-YC1000-480. \$489.00 APsystems YC1000-3 MicroInverter [APS-YC1000-480] The YC1000 is the industry's first true 3-phase (no phase balancing) solar microinverter, handling commercial grid voltages of 208, 277Y/480 with 900 watts maximum output, ZigBee communication and an integrated ground. ...

APS: YC-1000-3-NA-208 (10 Yrs Warranty) Features & attributes: ... ZigBee communication and an integrated ground. Up to four YC1000-3-208 units (16 modules total, 60- or 72-cell) can be installed on a single 15A circuit. This groundbreaking technology is only available from APsystems. ... Products Panel String Inverter Micro Inverter Optimizer ...

Unlike central inverters with high DC voltages in the hundreds of volts, APsystems microinverters tie directly to the low-voltage PV module and connect to the public power grid via standard AC voltages - enhancing worker ...
