

What is Arcadia Power's new community solar program?

Arcadia Power's new community solar program seeks to remove a few key historical barriers to entry for residential customers interested in community solar programs. To ensure residential customers will buy solar power from these developments for years to come, community solar programs typically offer long-term (20-year) contracts.

Where are Arcadia's community solar projects located?

Arcadia's community solar projects are currently in just four states: Illinois, Massachusetts, New Jersey, and Colorado. By the end of 2020, Bhatraju hopes customers in nine states will have access to community solar. Arcadia is enabling the masses to connect to clean, renewable energy at lower costs.

How do community solar farms benefit from Arcadia?

Community solar farms can generate more than a 10% savings by supplying the power grid with clean energy. They pay Arcadia to find people interested in supporting clean energy to put on their farms.

Where is Arcadia Power Solar available?

Currently, the Arcadia Power community solar program is available to customers in New York, Maryland, Massachusetts, Colorado, California, Georgia, New Hampshire, New Jersey, and the District of Columbia. Don't live in these regions?

Who is Arcadia solar?

Arcadia has 20 live community solar projects and around 40 projects in development, making them the largest residential community solar manager in the country. We have a new type of platform for the home that can connect people to products that can be hard to find, hard to connect to, and hard to understand.

Can I save money with Arcadia solar?
