

## **Are solar power plants excluded from 100 bonus depreciation rules**

Will solar equipment be depreciated in 2022?

Currently, in 2022, the basis of depreciation of qualifying solar equipment is 87% - there is 13% deducted from the overall project costs to account for half of the ITC. As of January 1, 2023 the bonus depreciation will again drop - this time to 80% to be depreciated in year 1.

How does solar depreciation work?

Solar has a 5-year cost recovery period. Bonus depreciation allows an investor to recognize 100% of the depreciation in the same tax year the system is placed in service. Currently, in 2022, the basis of depreciation of qualifying solar equipment is 87% - there is 13% deducted from the overall project costs to account for half of the ITC.

How much depreciation does a solar panel system have?

For instance, a \$100,000 solar panel system with a \$10,000 salvage value would have an annual depreciation of \$18,000. This method provides predictability and simplicity in financial reporting, aligning with GAAP standards. The declining balance method accelerates depreciation, allowing for higher expenses in the early years.

What is the bonus depreciation percentage for qualified property?

The bonus depreciation percentage for qualified property that a taxpayer acquired before Sept. 28, 2017, and placed in service before Jan. 1, 2018, remains at 50 percent. Special rules apply for longer production period property and certain aircraft.

What is the depreciation deduction under Sec 168(k)(1)(a)?
