

# Are solar power purchase agreements worth it

What is a solar power purchase agreement?

A solar power purchase agreement (PPA) is an arrangement where a solar company installs and maintains a renewable energy system on a home, selling the generated power to the homeowner at a low rate. This is one of the many solar energy arrangements, often referred to as 'solar'.

Should I buy a solar lease or a PPA?

When deciding between a solar lease and a Power Purchase Agreement (PPA), consider the following: With a solar lease or a solar loan, the monthly payments are typically fixed. However, if you own your solar panels, they may increase your property value, which a PPA may not provide and could even complicate selling your home.

Who owns the solar equipment in a PPA?

In a Power Purchase Agreement (PPA), the PPA company is the equipment owner. They get the federal solar tax credit and state tax incentives for installing the system. You, as the homeowner, agree to purchase the electricity produced by the system at a predetermined rate.

Should I buy solar panels at the end of my PPA contract?

At the end of your PPA contract, you can choose to renew the agreement, have the system removed, or purchase the solar panels at fair market value. However, purchasing the system at the end of the contract would actually cost you more in the long run than if you had purchased a system to begin with.

Is a solar PPA a good idea?

A solar Power Purchase Agreement (PPA) is a good way for homeowners without the financial means to outright purchase a solar system to still enjoy savings on their monthly energy bill. It saves on the steep upfront costs and time-consuming nature of installing solar panels while providing a quick and affordable path to going green.

What is a Power Purchase Agreement (PPA)?

One way to access solar energy is by opting for a power purchase agreement (PPA). This allows you to acquire the system without paying the upfront price.
