How popular is solar energy in Arizona?

The popularity of residential solar energy use has been growing slowly in Arizona over the past three years. Arizona ranks fifth in solar energy installations across the United States and has almost 300 solar energy companies in the state.

Who are the best solar companies in Arizona?

We have interviewed 43 experts in the solar energy space and shadowed NC Solar Now during a solar installation to better inform our content. The MarketWatch Guides team's picks for the best solar companies in Arizona include Elevation and Palmetto Solar.

How has solar power changed Arizona's energy mix?

The U.S. Energy Information Administration (EIA) reports that solar power has helped reduce the share of coal in the state's energy mix from 38% in 2013 to just 12% in 2022. While solar power makes up a significant portion of Arizona's energy mix, it is residential solar that has boosted the growth of the technology in the state.

Does Arizona have residential solar?

While solar power makes up a significant portion of Arizona's energy mix, it is residential solar that has boosted the growth of the technology in the state. According to the Pew Research Centre, Arizona has the second-highest number of residential solar systems in the country.

How much solar power does Arizona have?

When looking at the numbers, the rapid growth of solar power in Arizona becomes clear. According to the SEIA, the state already has 6.5 gigawatts (GW) of installed solar energy -- enough to power over 1 million homes -- and is set to add another 9.8 GW over the next five years.
