

Arizona public service versus fights solar power

Does solar work in Arizona?

When individuals try to break free of the utility company's grip over their electric bill by installing solar it can be a difficult hurdle to jump. That's by design, advocates claim. "In Arizona, people understand that solar is here. They understand that solar works," said Bret Fanshaw, director of Solar United Neighbors of Arizona.

Will APS snatch solar energy from consumers?

O'Halleran praised utility companies for their efforts to bolster clean energy. "Over the last three or four years, I've seen a transformational change in the future for renewable energies," he said. "That's our collective future." But Gordon, the Mesa homeowner, sees APS snatching the freedom of solar energy from the hands of consumers.

Is Arizona a good place to buy solar power?

Arizona is a top generator of solar power, but it doesn't trickle down to the residential electric customers because a quarter of it is sold to utilities in other states, especially Nevada and California.

Will Maricopa County put solar energy projects on public ground?

Officials at the Bureau of Land Management are reviewing three applications to put utility-scale solar energy projects on public ground in Maricopa County. The 1500 megawatt project split across three solar farms would be built just north of Gila Bend, northwest of the White Tank Mountains, and south of State Route 238 near the Pinal County line.

Does Massachusetts have more solar power than Arizona?

By that calculation, Massachusetts harnesses more sunlight than Arizona, with 20 percent of that state's power generation stemming from solar despite having 197 sunny days each year, below the national average.

How much does SRP charge for solar?

SRP charges solar customers an extra \$12 every month merely for having solar - even though a similar charge was thrown out of a rate case at the Corporation Commission for APS. It feels arbitrary, Miller said. Customers classified this as price discrimination. The appeals court didn't rule it out.
