

What is the federal tax credit for solar panels in Arizona?

When you file your federal income taxes, you can claim this incentive as a credit towards your federal tax bill. The average cost for a 5 kW solar panel system is around \$10,747 in Arizona. Once you factor in the 30% credit, the cost comes down to \$7,523.

Are solar panels a good investment in Arizona?

Solar panel systems in Arizona can be expensive, but they are a good investment due to the available incentives. The federal tax credit and other state-specific incentives can help you save thousands, making solar panels well worth the investment.

How much can you save on solar panels in Arizona?

Solar panel systems in Arizona are expensive, but incentives from the state and federal governments can help you reduce the upfront cost. Between the federal tax credit and other state-specific incentives, you can save thousands on solar panels, making them well worth the investment.

How much does a 5 kW solar system cost in Arizona?

The average cost of a 5 kW solar panel system in Arizona is around \$10,747. After applying the 30% federal tax credit, the cost comes down to \$7,523. You can claim this incentive as a credit towards your federal tax bill when you file your income taxes.

What is the 'Solar for All Arizonans' program?

The 'Solar for All Arizonans' program is a plan to deploy over 61 MW of new solar resources across Arizona, benefitting thousands of low-income families, renters, and rural and Tribal communities. Governor Katie Hobbs stated, 'Solar for All Arizonans is a critical program that will lower energy costs for thousands of Arizonans.'

Why should you choose an Arizona solar installer?

A.R.E.P is a coalition of local solar installers preferred by Arizona's large utility companies. These installers allow homeowners to go solar with no out-of-pocket cost and save money while helping create a sustainable environment, thanks to government mandates and assistance from Arizona's largest utility providers.
