

Which states were included in the 2012 Western Solar Plan?

The 2012 Western Solar Plan included six southwestern states: Arizona, California, Colorado, Nevada, New Mexico, and Utah. The BLM is committed to planning for responsible solar energy development on public land in a responsible way that balances the need for clean energy with protection of natural, cultural, and historic resources.

How many homes will Jove solar power in Arizona?

The US approves Jove Solar's 600-megawatt project in Arizona, set to power 180,000 homes and advance clean energy development.

What is the Western Solar Plan?

"The updated Western Solar Plan is a responsible, pragmatic strategy for developing solar energy on our nation's public lands that supports national clean energy goals and long-term national energy security," said BLM Director Tracy Stone-Manning.

What is a BLM Solar Plan?

The BLM is committed to planning for responsible solar energy development on public land. A BLM Solar Plan is a balanced approach that considers the need for clean energy while protecting natural, cultural, and historic resources. The 2012 Western Solar Plan, for instance, covered six southwestern states.

Is variance land a solar energy zone?

Variance land is not designated as a solar energy zone, requiring Jove Solar to seek approval from agencies such as the Bureau of Land Management (BLM), Arizona Game and Fish Department (AZGFD), and US Fish and Wildlife Service (FWS) before construction begins.

Which states are being considered for solar planning expansion?

The BLM is considering whether to expand this solar planning effort to include five additional states: Idaho, Montana, Oregon, Washington, and Wyoming. Updated planning effort will guide additional solar energy development on public lands

The vast solar farm covers more than 6,000 acres, or 9 square miles. By 2026, it will generate 973 megawatts of emission-free electricity and, over time, \$300 million in lease payments and taxes to Arizona schools and ...

Investing in renewable solar energy. While rooftop solar benefits individual homes and businesses, SRP is committed to investing in solar energy on a large scale. Utility-scale solar energy is produced in a commercial facility, like a solar farm, ...

The final price plans, approved by the SRP Board, fail to fairly compensate solar customers for the energy they export to the grid, discouraging solar development and stifling the growth of clean and local energy.

Serving ...

Given the comparative inefficiency of solar versus fossil fuels in terms of energy output volumes - +/-220MW/project for Arizona solar projects vs. an average of 600MW/U.S. coal plant - solar had long been dismissed as a ...

About SEIA. The Solar Energy Industries Association (SEIA) is leading the transformation to a clean energy economy. SEIA works with its 1,200 member companies and other strategic partners to fight for policies that create jobs in ...

FLORENCE -- Four solar energy farms outside of Florence, Eloy and Arizona City were approved with major amendments to the Pinal County Comprehensive Plan by the Board of Supervisors Wednesday.

Understand key Arizona solar power laws, including regulations on net metering, permitting, equipment standards, HOA rules, and utility requirements. Arizona's abundant ...

Resource planners track Arizona's projected growth over 15 years, lay out future power supply . APS filed the 2023 APS Integrated Resource Plan (IRP) at the Arizona Corporation Commission today. It includes strategic ...

Several utilities - Tucson Electric Power (TEP), UniSource Energy Services (UNSE) and Arizona Public Services (APS) - in Arizona, the US, have released this week their Integrated Resource Plan...

The corporation commission's approach to long-range planning is a testament to Arizona's forward-thinking approach to energy policy -- but it's important to remember that energy plans are ...

The latest in Arizona solar and energy news. Home 2024 CONFERENCE About Join News NEWS See what AriSEIA is up to on the policy front. ... Applying for rehearing is a necessary step towards appealing to the ...

The Arizona Renewable Energy Program ensures every eligible residential home can take advantage of the solar options that are now available. With government mandates and assistance from Arizona's largest utility providers, homeowners ...

Like every other state, Arizona has a unique set of incentives, benefits, and challenges when it comes to investing in solar panels for houses. This guide helps homeowners understand all that is important regarding ...

See the recent AriSEIA News articles - If you are an Arizona Public Service (APS) customer with rooftop solar, now is the time to send a message to the Arizona Corporation Commission about the "Grid Access Charge" that ...

In this exercise, we will utilize an example to identify suitable areas for solar farms in Arizona. The most basic

way to develop a MCE is through a combination of criteria expressed in terms of "what can be used" and "what can't be used" in ...

Estimates for potential solar generation likely to be developed by 2020 have been derived by compiling estimates provided by Arizona's largest utilities, Arizona Public Service ...

The Flatland Energy Storage Project will be a 200-MW/800-MWh battery energy storage system located near Coolidge, Arizona. The project will use Tesla lithium-ion battery energy storage systems. Scheduled to be online ...

La Paz County, AZ - The Bureau of Land Management (BLM) has granted approval for the 600-megawatt Jove Solar Project, expanding clean energy generation on public lands. The project, which is expected to generate ...

Home solar panels and solar energy are growing in Arizona, even as Arizona's already a major solar state. Here's a guide to information and savings in Arizona. ... Palmetto's LightReach Energy Plan, available in ...

The \$2 billion Sun Stream Complex in western Maricopa County will soon generate enough power to supply over 200,000 homes. The first phase has been transforming Arizona's scalding sunlight into electricity for more than ...
