

Does Arizona have solar?

Arizona has a large capacity in home solar panels and large-scale solar facilities already in use. The state ranked fifth in the US in solar-powered energy generation in 2023 according to the US Energy Information Administration. With so much predictable sun for so much of the year, solar makes sense for many Arizonans.

Which solar companies are available in Arizona?

No current offers available. If you're going solar in Arizona, local solar companies like Sun Valley Solar Solutions and Verde Solar Power can provide a significant amount of value for residents, but the larger national companies service the entire state and have more resources for your installation.

Why should you switch to solar energy in Arizona?

Switching to solar power energy provides clean, renewable energy. Choose Arizona's Top Solar Company. Why go solar? With discounted prices and locked-in rates, you can save thousands of dollars that would otherwise go to the utility companies. Possible tax credits make adding solar to your home even more affordable.

How many solar installers are there in Arizona?

Reputation: Arizona is home to over 170 solar installers, according to the Solar Energy Industries Association (SEIA). With that many companies, it's crucial that you find one with a solid reputation and years of experience serving Arizona customers like yourself.

Are solar panels worth it in Arizona?

For many homeowners, going solar is worth it in Arizona for the reduction in energy bills and reliance on local power companies. Over 25 years, Arizona homeowners with solar panels can save about \$59,661 in total utility power costs. A typical residential solar panel installation usually pays for itself within 7 years in Arizona.

How much does a solar system cost in Arizona?

A typical Arizona household needs a system with a capacity of 9.2 kW to offset enough energy costs to make solar viable. Depending on your household energy usage, you might need a smaller or larger system. Most installers set the price according to the system's wattage, with a typical cost between \$2.50 and \$5 per watt.

Save on Energy says that homeowners in Arizona pay \$3 to \$5 per watt for a residential solar energy unit. An average five-kilowatt system is typically between \$15,000 and \$25,000. But, there are ...
