

What is Arizona Solar Energy Industries Association (ariseia)?

Arizona Solar Energy Industries Association (AriSEIA) is a 501 (c) (6) trade organization and the state affiliate of the Solar Energy Industries Association (SEIA). AriSEIA works to develop and support policies that create opportunities to advance Arizona's economy through solar energy, storage, and electrification.

Will changes to Arizona's solar export rate affect homeowners?

Autumn Johnson, Arizona Solar Energy Industries Association (AriSEIA), said, "Any changes to the solar export rate would not only affect homeowners but could also jeopardize our state's economic development."

Does Arizona have a solar market?

Data Current Through: Q3 2024 Arizona is one of the sunniest states and has huge potential for its solar market. While the state solar industry has tremendous growth opportunity, due to public debates about the benefits of solar, elimination of incentives, and declining compensation for distributed solar resources the market has been turbulent.

Can solar power improve Arizona's air quality and water quality?

Much of Arizona has very serious air quality and water quantity challenges. Increased deployment of renewable energy can help alleviate both problems. Solar has no point source emissions and lower lifecycle emissions than fossil fuels. It also uses less water in operations and in its lifecycle than most other electricity generating technologies.

What is Arizona's solar compensation plan?

The original 2017 decision, reached after a lengthy evidentiary hearing as well as extensive deliberation and compromise, was designed to ensure predictable compensation for solar owners while providing stability to Arizona's rooftop solar market.

What is Vote Solar?

Vote Solar is a 501 (c)3 non-profit organization. Vote Solar advocates for state policies and programs needed to repower our electric grid with clean energy. Vote Solar works to remove regulatory barriers and implement key policies needed to bring solar to scale.

Arizona is one of the sunniest states in the US with huge potential for the growth of solar PV. As of the end of the second quarter of 2023, the state had 6.6GW of solar capacity installed,...
